Jin-Sil Choi

A sad day for Korea, and how the Internet played its part

- Yesterday was a truly sad day for all Koreans. Jin-sil Choi, Korea's top actress, was found dead, as she apparently committed a suicide. To put this in perspective, imagine this morning you just saw the headline "Angelina Jolie committed a suicide". Yes, Choi was THE most loved Korean actress of our times.
- What makes it even sadder is the stories emanating from this tragedy, that she was suffering from depression, and much of it came from the "bad comments on the internet." It was found Choi actually cared about the comments about her, often spending hours reading all thousands of comments, many of which I assume were worthless piece of garbage.

Schüler dürfen Lehrer im Web benoten

- Die Benotung von Lehrern durch ihre Schüler im deutschen Internet-Portal Spickmich ist rechtens. Das entschied das Kölner Oberlandesgericht [OLG] am Dienstag nach der Klage einer Gymnasiallehrerin, die sich verunglimpft sah und eine einstweilige Verfügung beantragt hatte.
- Die Benotung von Lehrern sei durch das Grundrecht auf freie Meinungsäußerung gedeckt, erklärte das OLG und bestätigte damit ein entsprechendes Urteil des Kölner Landgerichts vom Juli. In dem Internet-Portal können Schüler ihre Lehrer in Kategorien wie "gut vorbereitet", "faire Noten" und "cool" von eins bis sechs bewerten.

- Instantaneous photographs and newspaper enterprise have invaded the sacred precincts of private and domestic life; and numerous mechanical devices threaten to make good the prediction that “what is whispered in the closet shall be proclaimed from the house-tops.” For years there has been a feeling that the law must afford some remedy for unauthorized circulation of portraits of private persons.

Wiki Choice Wizard

What you see is what you get (WYSIWYG) Step 2

Most Wikis use a simple markup language to format texts, but recently some Wikis introduced real WYSIWYG editors as known from desktop text processors.

On the one hand WYSIWYG editors make it very easy for non-tech savvy users to contribute. On the other hand experienced users often prefer a simple markup for its greater flexibility and faster text entry.

Do you need a WYSIWYG enabled Wiki?

I don't care

Yes, **WYSIWYG** is crucial for me
