Ambient Assisted Living

2nd session with projects funded under call AAL-2008-1

Vienna, 1st October 2009
ICT based solutions for prevention and management of chronic conditions of elderly people

- Solutions for elderly persons with identified risk factors and/or chronic conditions
- Aiming at solutions centred on the elderly person (not the professional or an organisation), including citizen empowerment and peer support
- Focused but not restricted to home environment, also solutions within the community and when travelling can be proposed
- Focusing on solutions that keep the individual out of the long-term care and hospitals.
- Objective is to enhance the individual’s autonomy, independence and quality of life

Vienna, 1 October 2009
